## HY-TECH ENGINEERED SOLUTIONS LAUNCHES ATP CYCLONE AIR GRINDERS, DELIVERING POWERFUL CONTROLLED AIR TOOL PERFORMANCE FROM .5HP TO 4HP.

Cranberry Twp. PA, January 21, 2020... Hy-Tech Engineered Solutions, a leading manufacturer of high quality pneumatic tools and replacement parts, is pleased to announce the introduction of ATP CYCLONE™ GRINDERS. This new series of Heavy Duty industrial air grinders features some of the highest power-to-weight ratios available today in power ranges from .5HP to 4 HP tools.

Designed specifically to deliver higher productivity in the most demanding metal finishing environments, ATP CYCLONE™ GRINDERS are ideal for fabricated metals, ship building, and a host of MRO applications including refinery, power generation, structural steel.

ATP CYCLONE™ GRINDERS feature governed motors on 0.5HP to 4.0HP product range, enabling powerful yet controlled performance. Consistent power output as rated across the line enables Cyclone products to maximize metal removal efficiencies and operator productivity.

The ATP CYCLONE™ air grinder series comprise:

- 44 standard models featuring powerful governed controlled motors
- Stainless steel, corrosion resistant governors
- Standard and extended length horizontal models, with up to 36" extensions
- True 3HP and 4HP vertical and horizontal performance
- Designed and built with operator comfort in mind

“Our products are found in critical applications serving the fabricated metals, power generation, petrochemical, ship building, construction, refinery, railroad, and mining industries,” observes Douglas Ciabotti, President of Hy-Tech. “These new ATP products further strengthen and expand ATP’s lineup, and complement our broad range of air tool replacement parts, available for many leading OEM brands.”

These remarkable new products join Hy-Tech’s other brands including ATP Magnum Force™ Impacts, ATP Impact Sockets and Striking Wrenches, NUMATX Compression Riveters, Thaxton High Pressure Test Plugs, Custom Gear Products, and Flex-Tech Manufacturing. Hy-Tech also provides engineered solutions and reverse engineering services to many Original Equipment Manufacturers.
