HY-TECH ENGINEERED SOLUTIONS ADDS ATP IMPACT SOCKETS, STRIKING WRENCHES AND ACCESSORIES, CREATING ONE OF THE INDUSTRY'S BROADEST OFFERINGS FOR INDUSTRIAL BOLTING APPLICATIONS.

Cranberry Twp. PA, January 21, 2020... Hy-Tech Engineered Solutions, a leading manufacturer of high-quality pneumatic tools and replacement parts, is pleased to announce the introduction of ATP Impact Sockets, Striking Wrenches and Accessories. These industrial bolting tools, featuring the broadest range of drive sizes, socket and striking wrench openings, will bring new efficiencies to a multitude of industrial MRO applications.

Precision forged and heat treated from the highest quality materials, this new series of ATP Heavy Duty tools deliver everything skilled craftsmen need for productive and safe industrial bolting work in virtually any environment.

Available products include:

- Socket drive sizes of 1/2", 5/8", 3/4", 1", #5 spline, 1-1/2", 1-3/4", 2", 2-1/2", and 3-1/2"
- Sockets available in standard and deep lengths, with 4, 6, 8, and 12-point openings
- Broadest range of socket across the flat's openings in all drive sizes
- Thin wall sockets in 1/2", 3/4" and 1" drive sizes
- Flat 12 point striking wrench sizes from 7/8" to 9" and metric sizes from 22mm to 230mm
- Offset 12-point striking wrench sizes from 1-1/16" to 3-1/2" sizes
- Spark proof standard length socket drive sizes in 1/2", 3/4", 1", 1-1/2", and 2-1/2"
- Torx head sockets, Allen head sockets, Adapters and Universals
- Square drive extensions in 1/2" to 2-1/2" drive sizes, up to 24" in length
- Socket and accessories product specials available upon request

"Hy-Tech sells an enormous range of tools, parts and products under a number of well-respected brand names", observes Douglas Ciabotti, President of Hy-Tech. "Our products are found in critical applications serving the fabricated metals, power generation, petrochemical, ship building, construction, refinery, railroad, and mining industries. These new ATP products further strengthen the most extensive line of industrial impact tools offered today, and complement our broad range of air tool replacement parts, available for many leading OEM brands."

These new tools join Hy-Tech's other brands and products including ATP Magnum Force Impact Tools, ATP Cyclone Grinders, NUMATX Compression Riveters, Thaxton High Pressure Test Plugs, Flex-Tech Contract Machining and a wide range of bevel, spur and standard industrial gear products. Hy-Tech also provides engineered solutions and reverse engineering services to Original Equipment Manufacturers.
